

During the FY 2019-2020, the Council provided 3,544 persons with disabilities from across the Country with assistive devices. These included hearing aids, crutches, wheelchairs, tricycles, white canes, walking frames among others. This was against a target of 4,000. The variance is attributed to Covid-19 pandemic restriction that limited capacity to conduct assessments of clients. The table below shows a summary of devices provided across various categories of disability.
